PROFESSIONAL SUMMARY

Senior Platform Software Engineer with 8+ years of experience in enterprise integrations, production support, and cloud technologies. Currently focused on Oracle Integration Cloud (OIC), Managed File Transfer (MFT), Oracle Data Integrator (ODI), OSB, and ERP integrations in production environments. Experienced in building, troubleshooting, and maintaining end-to-end data flows across on-prem and cloud platforms. Strong background in DevOps practices, CI/CD pipelines, and Azure/AWS cloud infrastructure. Proven track record of resolving N1-N3 incidents under SLA-driven processes and collaborating with cross-functional teams across multiple time zones.

PROFESSIONAL EXPERIENCE

Oracle — Senior Platform Software Engineer, Customer Success Services (CSS)

Nov 2025 – Sep 2026 | Mexico City, Mexico (Remote)

- Support enterprise customers across Oracle Integration Cloud (OIC), Managed File Transfer (MFT), Oracle Data Integrator (ODI), OSB, ERP, PL/SQL, WebLogic, APIs, and middleware in production environments.
- Troubleshoot incidents across UI, API, middleware, database, file transfer, and integration layers; perform root cause analysis and implement permanent fixes.
- Support production stability, go-live activities, incident resolution, and controlled change execution (RFC/CAB).
- Collaborate with technical and functional teams to diagnose failures, validate data flows, and reduce operational impact.
- Contributed to regional ATP wallet renewal initiative: reviewed wallet expirations, maintained tracking in Confluence, created RFCs, coordinated approvals, and supported execution across multiple regions.
- Supported OIC scheduler inventory initiative: identified integrations using personal accounts in scheduled configurations and supported transition to system users.
- Onboarded two teammates from Brazil: initial process understanding, ODI Studio access, database connectivity, WebLogic access, RFC tracking, and action plan preparation.
- Prototyped internal productivity tools to standardize recurring support activities, improve navigation across internal resources, and organize RFC follow-up.
- Earned OCI 2025 Foundations Associate and OCI 2025 AI Foundations Associate certifications.

Sofisoft — Cloud DevOps Developer (Assignment: GEPP)

Jul 2025 – Oct 2025 | Mexico (Remote)

- Supported cloud infrastructure, deployment processes, and operational reliability across Azure and AWS environments.
- Worked on deployment, monitoring, and operational support for cloud-based services.
- Collaborated with development and operations teams to improve release reliability and issue resolution.
- Applied automation and cloud operations practices to support business-critical processes.

BID — Buro de Identidad Digital — Senior Technological Engineer

Jun 2022 – Apr 2025 | Mexico (Remote)

- Led development of 5+ mobile apps for identity validation, integrating biometric SDKs (Mitek/Veridas) that improved capture accuracy from 90% to 98%.
- Optimized OCR workflow performance using lazy loading and caching, reducing response time by ~35%.
- Implemented reusable Angular modules that accelerated development across parallel projects.
- Designed interfaces with SVG/CSS animations for intuitive user flows.
- Collaborated with backend teams on REST API design for secure data processing.

DTI-Consultores — Senior Oracle Consultant & Full Stack Developer

May 2021 – Feb 2025 | Mexico (Remote)

- Provided Oracle consulting and production support for enterprise customers across US, Canada, and Mexico.
- Supported production environments involving ERP, OSB, OIC, ODI, MFT, PL/SQL, BI Publisher, and middleware integrations.
